Northwest Plumbing Heating & AC Emphasizes Heater Installation and Repair Services as Winter Approaches

July 27, 2026

DAVENPORT, Iowa - July 27, 2026 -

Northwest Plumbing Heating & AC has announced its focus on furnace repair and installation services as temperatures drop across the Quad Cities region, emphasizing the importance of heating system maintenance before the coldest months arrive. The company, which has served the area since 1923, is reminding homeowners to schedule heating system inspections and necessary repairs to avoid emergency breakdowns during peak winter conditions.

The announcement comes as the region experiences its first significant temperature drops of the season, prompting increased service calls for heating system evaluations. Northwest Plumbing Heating & AC reports that many homeowners discover heating issues only when they first attempt to use their furnaces after months of inactivity, often leading to urgent repair needs that could have been prevented through proper maintenance.

"As temperatures continue to drop, we're seeing a significant increase in service calls from homeowners experiencing heating system failures," said Bill Durand, spokesperson for Northwest Plumbing Heating & AC. "Many of these issues could be avoided with preventive maintenance, which is why we're encouraging residents to schedule their heating system inspections now, before the coldest weather arrives."

The company offers comprehensive heating services including furnace repair and installation, annual heating system checks, boiler repair and installation, and high-efficiency heating system upgrades. These services are complemented by the company's plumbing capabilities, providing year-round support for essential home systems. The company maintains 24-hour emergency service availability to address urgent heating failures that can occur during severe weather conditions. The company regularly publishes maintenance reminders and energy-saving tips through its social media channels, contributing to what industry observers might describe in a news article as a comprehensive customer education initiative.

Northwest Plumbing Heating & AC has also highlighted its Deal of the Month program, which offers special pricing on essential home services throughout the year. This initiative allows homeowners to address maintenance needs at reduced costs while ensuring their systems operate efficiently when needed most. The company's Service Partner Agreements provide annual maintenance and priority scheduling, helping identify potential issues before they become costly repairs.

The company's certified technicians have experience with all major brands and models of residential heating equipment, enabling them to service virtually any system in the Quad Cities area. This expertise becomes particularly valuable during the winter months when heating system reliability is critical for home comfort and safety.

Beyond traditional service announcements, the company maintains an active presence on Facebook where it shares seasonal maintenance tips and heating system care advice. This educational approach helps homeowners understand their heating systems better and recognize early warning signs of potential problems.

Northwest Plumbing Heating & AC continues to serve the Quad Cities area with comprehensive plumbing, heating, and air conditioning services. Founded in 1923, the locally owned company has built its reputation on professional service, technical expertise, and commitment to customer satisfaction throughout nearly a century of operation.
